e-Learning for Plastic, Reconstructive and Aesthetic Surgery

The British Association of Plastic, Reconstructive and Aesthetic Surgeons, in partnership with e-Learning for Healthcare, has developed an e-learning resource to support good clinical practice.

e-LPRAS supports the training programme for plastic, reconstructive and aesthetic surgery and is aimed at plastic surgery trainees from specialty training year 3 (ST3) onwards. The e-learning will also appeal to consultants, non-consultant career grades and allied health professionals who want to increase and update their knowledge base. e-LPRAS is designed to cover the broad spectrum of the plastic surgery speciality in line with the [Intercollegiate Surgical Curriculum Project](#).

The content will be split into the following modules:

- Essentials of plastic, reconstructive and aesthetic surgery
- Surgical principles of plastic, reconstructive and aesthetic surgery
- Head and neck surgery
- Congenital head, neck and skin
- Upper limb
- Breast and chest wall
- Lower trunk
- Lower limb
- Burns

e-LPRAS provides new and complementary material to support rather than replace existing learning resources.

This peer-reviewed, evidence based e-learning is available free of charge, to all clinicians in the NHS throughout the UK (and equivalent in the Republic of Ireland) and to full members of BAPRAS.

Once registered, you will be able to access each 20–30 minute session via the internet from work or home.

High resolution images, videos, animations and assessments will engage you throughout the learning process. You will be encouraged to plan and record your learning and use your newly acquired knowledge to reflect on your clinical practice.

For more information, please contact the e-LPRAS team at [elpras@e-lfh.org.uk](mailto:elpras@e-lfh.org.uk).
